

OpenFISMA+
The Automated Risk Management Framework

OpenFISMA+ Highly customizable automated compliance tracking, reporting and documentation tool for multiple standards.

OpenFISMA+ An enterprise level tool that provides a framework of managing IT/information security risk and compliance needs of security assessment, continuous monitoring, and ongoing authorization.

OpenFISMA+ provides for centralized management of Plan of Action and Milestones (POA&M's) for findings.

OpenFISMA+ automates system inventory and reporting requirements.

OpenFISMA+ Modules – Focusing on the Risk Management Framework

Findings Module	Security Authorization Module	Vulnerability Module
<ul style="list-style-type: none"> • Customizable workflow for findings remediation 	<ul style="list-style-type: none"> • Create and manage organization and system hierarchy 	<ul style="list-style-type: none"> • Import vulnerabilities from scanning applications
<ul style="list-style-type: none"> • Track false positives and risk acceptance 	<ul style="list-style-type: none"> • Designate common and inherited controls 	<ul style="list-style-type: none"> • Centralized management for tracking of vulnerabilities
<ul style="list-style-type: none"> • Track and upload evidence and artifacts 	<ul style="list-style-type: none"> • Implement the RMF using the OF+ RMF Wizard 	<ul style="list-style-type: none"> • Vulnerabilities convert to findings as defined by policy
<ul style="list-style-type: none"> • Link findings together 	<ul style="list-style-type: none"> ○ Conduct PIA/PTA analysis 	<ul style="list-style-type: none"> • Vulnerability artifact repository
<ul style="list-style-type: none"> • Track open, overdue, and closed findings 	<ul style="list-style-type: none"> ○ Generate system security plan and other system documentation 	<ul style="list-style-type: none"> • Customizable workflow for vulnerability remediation
<ul style="list-style-type: none"> • Collaborate to resolve findings 	<ul style="list-style-type: none"> ○ Monitor critical findings reporting deadlines 	
<ul style="list-style-type: none"> • Advanced report generation including OMB reporting 	<ul style="list-style-type: none"> ○ Track and share system implementation details 	
<ul style="list-style-type: none"> • Dashboard views to drive analysis and reporting 	<ul style="list-style-type: none"> ○ Track and share IV&V assessment results 	
	<ul style="list-style-type: none"> • Integrates various security control catalogs such as ISO and NIST 	
	<ul style="list-style-type: none"> • Report on RMF implementation status across the enterprise
